Ed, as promised, the CSPO Organization Chart. The people in the SAFE-C program are exclusively doing CIA work. However, the VMU responsibility is also there. DIA will need point-of-contact if all of [ ] folks go to OIR. [ ] is available 50% of his time now to help OIR get started. Not sure if he really wants to play. Might want to see you for some career guidance. He'll, of course, do whatever OIT wants but may need a gentle push from you. Now, when OIR splits off in October, we can add some more players. [ ] [ ] (she's not a secretary, more admin. assistant. DIA is not funding a SI next year, hence [ ] availability. We only have one CSPO contract next year for stuff like MRP rewrite and 3.7 which hang over the fiscal year boundary. (DIA contracts claim they cannot accept anything already in process on a new contract.) Hence [ ] availability. Might do to find him a real job. [ ] involved in Performance, Availability, and Capacity for CIA only. That only leaves me, [ ] I'm pretty sure DIA would be open to a negotiation surrounding us'uns that are left. We're working on a phase-out proposal, but the DIA folks here realize there is not much sense in maintaining CSPO for DIA with 3-4 OIT'ers remaining. I'm sure if we gave them [ ] they would free us from commitment (or some such other deal). Anyhow, I told DIA that D/OIT would honor his commitment to provide an appropriate number of people in support of the DIA program in FY89. Any change to that would have to be worked with D/OIT, not me. Unless I hear otherwise that's the way it will be.
